Stoneridge, leading the way with tachograph technology

Stoneridge, a leading developer of solutions for commercial vehicles, is returning to this year's CV Show to demonstrate a range of technology-driven products and services, including its new Fleet Healthcheck.

With Stoneridge fleets will have the opportunity to undertake a Health Check of their tachograph, remote download and tachograph analysis needs to see what time and money savings they could make with a range of Stoneridge products.

This includes their One Minute Rule digital tachograph, the **SE5000 Exakt Duo**. The Duo technology comes as standard and at no extra cost with all SE5000 Exakt Duos and gives real-time updates and countdowns on drive and rest times as well as warnings when nearing driving limits.

There is also a new addition to the Stoneridge range – Smartphone apps. Visitors will get the chance to demo Stoneridge's new, free tachograph apps, **Duo Mobile** and **Tacho Center**. With Duo Mobile drivers can now see drive, break and rest times in real time on their smartphone and Tacho Center enables the wireless download of digital tachograph data from any EU Type Approved digital tachograph.

Additionally, Stoneridge will be showcasing one of its newest technological innovations - the **Optimo** workshop tool, designed to increase workshop efficiency through ease of use and useful software applications. Featuring wireless technology, it takes tachograph programming and calibration into the future.

To learn more, visit Stoneridge on Stand 4F111 at the CV Show.

Note to Editors:

Stoneridge Electronics is a part of the Stoneridge Group, a leading designer and manufacturer of highly engineered electrical and electronic components, modules and systems. Stoneridge has a strong reputation for developing innovative, reliable products including instrument clusters, tachographs, telematics systems and security systems for the automotive industry. The Stoneridge group has an annual turnover of over \$700 million and just over 6,000 employees; of whom 550 work at Stoneridge Electronics.
