## Stoneridge to reveal new tachograph at CV Show 2014

Operators looking for user-friendly tachograph solutions should make their way to see Stoneridge Electronics on stand **4D26** where the company will not only showcase its expertise in tachograph solutions but will reveal a brand-new digital tachograph, the SE5000 Exakt Duo<sup>2</sup>.

The **new SE5000 Exakt Duo<sup>2</sup>** will help transport managers make more informed decisions when planning driving patterns. In addition to the already existing benefits such as the “One Minute Rule” and real-time updates and countdowns on drive and rest times, it will have a wealth of new features. Fleets will be pleased to see that they can now set how POA (Period of Availability) should be counted as SE5000 Exakt Duo<sup>2</sup> comes with an improved POA setting. Distribution trucks will benefit from Working Time Directive (WTD) calculations that have been added into the Duo functionality. Other new features include: new Ferry/train display in Duo; automatic activation of company locks when new card inserted, display of the product revision in Info menu and more.

Victoria Tramma, Marketing and Central Sales Manager at Stoneridge, comments: “*The CV Show 2014 gives us the perfect opportunity to launch our new SE5000 Exakt Duo<sup>2</sup>.*”, adding: “*We look forward to meeting both existing and potential new customers to show them how our tachograph solutions can save them both time and money.*”

Visitors to the Stoneridge stand can expect to experience how Stoneridge is at the forefront of tachograph technology. Both the **Duo Mobile** app, showing remaining drive, break and rest times on Android smartphones, and the **Tacho Center** app, for the wireless download of digital tachograph data, will be on display. Fleets are encouraged to find out more about Stoneridge’s cost-effective tachograph analysis software, **OPTAC3**, and their range of download devices such as the remote download tool **digiDL** and the Bluetooth **Tacho Link** dongle. Workshops can also look forward to seeing the **Optimo**, the latest generation tachograph programming and calibration tool, and how it integrates with the Rolling Road or Roller Brake Tester through an interactive demo

To learn more, visit Stoneridge on **stand 4D26** at the CV Show 2014.

### Note to Editors:

Stoneridge Electronics is a part of the Stoneridge Group, a leading designer and manufacturer of highly engineered electrical and electronic components, modules and systems. Stoneridge has a strong reputation for developing innovative, reliable products including instrument clusters, tachographs, telematics systems and security systems for the automotive industry. The Stoneridge group has an annual turnover of over \$947 million and just over 9,300 employees; of whom 1,140 work at Stoneridge Electronics.
